

The February 2023 meeting of the Diving Rebels Scuba Club will feature Mr. Windal Adams. Windal will share a 30-minute documentary titled "If Only" with your club. A question and answer session will occur after. This documentary is about Brain Bugge's death and it focuses on a number of aspects concerning human factors, human error, non-technical skills, psychological safety, and creating a Just Culture. These are themes and concepts which have been developed over many years in aviation because of the severe consequences of things going wrong- concepts which have not been formally accepted in diver programs or operations. This documentary exposes a number of these concepts around Brain's death and highlights what can be done to prevent such an event from occurring again.

Windal is currently an Instructor Trainer at Scuba Adventures in Plano who became certified in 1988 at Richland College in Dallas. If you were diving in the Dallas area in the 1990s then you might have crossed paths with Windal at either Aqua Adventures, Gator's Scuba Mart or one of the Dive West locations. He became an PADI Instructor in 1992, a TDI Instructor in 1999, a SDI Instructor in 2003 and a SDI / TDI Instructor Trainer last December.
